Website for Ministry of Science and Higher Education

Pages [For UI Designs]

- **Home page** – the home will have the following
    - Navigation bar [Home, documents, services, news, announcement and structure] plus [**about us , contact us, signup/login**]
    - Signup/Login – *As popup would be better*
    - Bootstrap's Jumbotron like, showing latest news
    - Popular news
    - Services
    - Social links
    - Footer – sitemap [same links from navigation bar], and address like phone number and email
- **Documents** – The website will have downloadable pdf files of different type (policies, strategies etc.
    - The document page will have filter for those types
- **Services** – Page where list of services by the ministry of science and higher education
- **Contact us**
- About **(Better if we can include google map of the office address and an image of the ministry office).**
- **Social links**
- **Structure – static page to showing company structure in image**

Function Requirement

- **Signup/Login** – An elevated user account should be able to login and manage contents
- **Dynamic Content Management** – Here allowed user [give it role as admin or author] should be able to upload new contents to the following pages and manage existing contents of:
    - **News** – **New news [video/Image + Caption (a paragraph about the news)]**
    - **Services –** Service to be added, edited or deleted
    - **Documents –** Document of type (*.pdf) only should be uploaded and specific type as strategy or policy should be selected**.**

Note: Models plus database design handle it by discussion within your team.
